```
#include <iostream>
using namespace std;

void swapNumbers(double &a, double &b) {
    double temp = a;
    a = b;
    b = temp;
}   // <-- This closing brace is required

int main() {
    double x, y;

    cout << "Enter first number: ";
    cin >> x;

    cout << "Enter second number: ";
    cin >> y;

    swapNumbers(x, y);

    cout << "After swapping:" << endl;
    cout << "First number: " << x << endl;
    cout << "Second number: " << y << endl;

    return 0;
}
```
